

Anthony Jones

Legal name: Anthony Jaamal Jones

Software Developer (contract) & Creator

Valdosta, GA

ajnthony87@gmail.com · <https://anthonyjjones.com/> · <https://github.com/Awkward8787> · <https://www.instagram.com/awkwardjones>

Summary

Independent software developer and creator based in Valdosta, GA. I build web and iOS products end to end, including payments and AI automation, and prefer contract work. Recent work includes an iPhone app submitted to the App Store (PassOkay) and a beat marketplace with Square checkout (AwkBeats).

Skills

Languages: TypeScript / JavaScript, Python, Swift, HTML / CSS, SQL, Shell / Bash, PHP, BrightScript

Front end: React, React Native / Expo, Vite, Astro, Next.js, Responsive & accessible UI

Back end & data: Node / Express, FastAPI, Supabase, PostgreSQL, Firebase, Appwrite, REST APIs, Auth & role-based access

Mobile: iOS (Swift), Expo / React Native, Apple Vision (on-device), StoreKit in-app purchases, App Store submission

Payments: Square, Stripe, Apple StoreKit

AI & automation: AI agents & orchestration, Workflow automation, Generative image & text models, Automated outreach & content

Infra & tooling: Docker, Git / GitHub, CI & PR review tooling, Hostinger / shared hosting, DNS & domains

Creative: Music production (Pro Tools), Brand & visual design, Copywriting, Video & audio production

IT & support: Tier-1 technical support, Hardware & software troubleshooting, Networking fundamentals, Cybersecurity fundamentals

Experience

Independent Software Developer & Creator (contract)

Vibe Virtue Enterprise · Valdosta, GA · 2009 to Present

- Design, build, and ship web and iOS products end to end: front end, back end, payments, brand, and the automation behind them.
- Submitted an iPhone app (PassOkay) to the App Store with on-device Apple Vision checks and StoreKit in-app purchase.
- Integrated real payments across projects with Square, Stripe, and StoreKit.
- Built and operate roughly 50 coordinated AI agents that run social, outreach, phone calls, documentation, and code review.
- Published open-source developer tools for pull-request review and automated fix-test loops.

Technical Support Advisor, Apple Support

Teleperformance · Remote · Dec 2025 to Present

- Provide customer-facing technical support for Apple products: diagnose issues, guide customers through fixes, and document cases.
- Explain technical steps in plain language and hand off unresolved issues with clear context.

Earlier roles include healthcare patient transport (SGMC, 2021–2025) and logistics and retail positions. Available on the full résumé.

Selected work

PassOkay

In App Store review (submitted Oct 19, 2026) · Solo designer & developer

Passport, visa, and ID photo app that checks your photo against the spec, entirely on your device.

Stack: Expo / React Native, Swift (Vision), StoreKit, Astro, Node

<https://passokay.com>

AwkBeats

Live · Developer & brand owner

Beat marketplace with lease tiers, sample packs, and booked sessions, built around Square checkout.

Stack: Vite / React, Express, Supabase, Square

<https://awkbeats.com>

<https://github.com/Awkward8787/AWKBEAT2026>

Autonomous AI operation (~50 agents)

Running (private operation) · Architect & operator

Around 50 purpose-built AI agents that run my brands, outreach, phone calls, documentation, and code review.

Stack: AI agents, Automation, Integrations

Loaded Sound Management

Live · Developer

Artist-management site with paid consultations, intake, bookings, and an admin back office.

Stack: Astro, Node, Square

<https://loadedsoundmgt.com>

<https://github.com/Awkward8787/Loaded-sound-management>

Darkjuan Logic Games (Coolbeanman)

Live · Solo developer

Free browser brain games for ages 10–16, with progress saved in the browser and optional donations.

Stack: Vite 6, React 19, TypeScript, PHP, Square

<https://coolbeanman.com>

<https://github.com/Awkward8787/Darkjuan-Logic-Games>

Restoration Fellowship Church

Live · Developer

Public church site plus a staff dashboard for events, outreach, photos, and prayer and guest lists.

Stack: Vite / React, TypeScript, Supabase

<https://www.rfcvaldosta.com/>

<https://github.com/Awkward8787/RFC>

Restaurant demo sites (x9)

Live (demo) · Developer

Nine static restaurant sites driven by one JSON file per page, with an in-browser cart.

Stack: Astro, JSON-driven, Static

<https://awkward8787.github.io/restaurant-demo-sites/>

<https://github.com/Awkward8787/restaurant-demo-sites>

CLUTCH

Repo (in development) · Developer

Hyper-local on-call labor marketplace for Valdosta: an iOS app and a web app on a shared backend.

Stack: Expo / React Native, Vite / React, Firebase

<https://github.com/Awkward8787/clutch-ios>

<https://github.com/Awkward8787/Clutch-app>

damage-report & damage-report-loop

Repo (published) · Author

Published developer tools for Cursor Agent: evidence-based PR status reports and bounded fix-test loops.

Stack: Shell, JavaScript, GitHub / CI

<https://github.com/Awkward8787/damage-report>

<https://github.com/Awkward8787/damage-report-loop>

The Couch Is Dirty (podcast platform)

Repo (in development) · Developer

Self-hosted podcast platform with Postgres auth and roles, plus an iOS app.

Stack: Vite / React, Postgres, Docker, Swift

<https://github.com/Awkward8787/The-Couch-Is-Dirty-Podcast-3>

<https://github.com/Awkward8787/The-couch-is-dirty-app>

Convertible Mortgage Calculator

Repo · Developer

Real-time mortgage comparison with convertible-ARM scenarios and a printable amortization schedule.

Stack: Vite / React, TypeScript

<https://github.com/Awkward8787/Convertible-mortgage-calculator>

SayThisRapThat

Repo · Developer

AI-assisted rap and trap songwriting with phonetic analysis and song structure.

Stack: Python, Docker, AI

<https://github.com/Awkward8787/SayThisRapThat>

FormFlow DB

Repo · Developer

Database-driven PDF autofill: a FastAPI service with a Next.js front end.

Stack: FastAPI, Next.js, Docker

<https://github.com/Awkward8787/formflow-db>

AI image tools (Coverly, BustDown, PeelPix)

Repo · Developer

Three image apps built on generative models: mixtape covers, style transforms, and a plain-language photo editor.

Stack: Vite / React, TypeScript, Gemini

<https://github.com/Awkward8787/Coverly->

<https://github.com/Awkward8787/BustDown-App>

<https://github.com/Awkward8787/Peel-Pix>

Vibe Virtue

Live (consulting site) · games planned · Founder & developer

My consulting umbrella: a live consulting site plus a tech-consulting app for local businesses.

Stack: Vite / React, TypeScript, Supabase

<https://vibevirtue.com>

Education

A.A., Audio & Video Production The Art Institute of Atlanta · 2013
